G. Howe high-affinity CRF binding. The activity of this receptor is mediated by G proteins which activate adenylyl cyclase.

C -1- SUBCELLULAR LOCATION: Integral membrane protein.
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                    Isold=P34998-3; Sequence=VSP 001996, VSP 001997;
Note=Does not bind to CRF with high affinity;
Name=CRF-R4; Synonyms=1D;
Isold=P34998-4; Sequence=VSP 001997, VSP 001998;
-1. TISSUB SPROTPICITY: Predominantly expressed in the cerebellum, pituitary, cerebral cortex and olfactory lobe.
-1. PTM: May be phosphorylated on Ser or Thr residues present in the
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                        C-terminal part.
-i- SIMILARITY: Belongs to the G-protein coupled receptor 2 family.
                                                                                                                         King M.M., Aronstam R.S., Sharma S.V.; acDNs clones of human proteins involved in signal transduction sequenced by the Guthric cDNA resource center (www.cdna.org)."; Submitted (NOV-2003) to the EMBL/GenBank/DDBJ databases.

Cell. Endocrinol. 144:21-35(1998).

-1 FUNCTION: This is a receptor for corticotropin releasing factor. Shows high-affinity CRF binding. The activity of this receptor is mediated by G proteins which activate adenylyl cyclase.

-1 SUBCELLULAR LOCATION: Integral membrane protein.
-1 PTM: Carboxyl-terminal Ser or Thr residues may be phosphorylated.
-1 SIMILARITY: Belongs to the G-protein coupled receptor 2 family.
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                      PRINTS; PRO1279; CRPRECEPTOR.

Wolecular clonding of a type A chicken corticotropin-releasing factor receptor with high affinity for urotensin I.";
Endocrinology 137.192-197(1996).
-!- FUNCTION: This is a receptor for corticotropin releasing factor. Shows high-affinity binding for urotensin I. The activity of this receptor is mediated by G proteins which activate adentyly
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                            4 GPRPALLLILPLLOAPLLWDSPVAASIOSOYCESLLPTTWHTGPQCNASVDLIGTCWPRS

                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                        Pred. No. is the number of results predicted by chance to have a score greater than or equal to the score of the result being printed, and is derived by analysis of the total score distribution.
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                      Sequence 6, P

                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                  ö
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                 Length 444;
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                     Sequence 15, Application US/08374009A

| Sequence 15, Application US/08374009A
| Patent No. 6495343
| GENERAL INFORMATION:
| APPLICANT: Pertin, Marilyn H.
| APPLICANT: Chewis, Kathy A.
| APPLICANT: Vale Jr. Wylie W.
| APPLICANT: Vale Jr. Wylie W.
| APPLICANT: Vale Jr. Wylie W.
| APPLICANT: Sawchenko, Paul
| TITLE OF INVENTION: Cloning and Recombinant Production of TITLE OF INVENTION NUMBER: US 08/079,320
| EARLIER FILING DATE: 1993-06-18
| EARLIER FILING DATE: 1993-06-18
| EARLIER FILING DATE: 1993-06-23
| EARLIER FILING DATE: 1994-05-25
| NUMBER OF SEQ ID NOS: 15

Sequence 2, Application US/08374009A

Patent No. 6495343

GENERAL INPORMATION:
APPLICANT: Chen, Ruoping
APPLICANT: Chen, Ruoping
APPLICANT: Lewis, Kathy A.
APPLICANT: Donaldson, Cynthia W.
APPLICANT: Sawchenko, Paul
ITILE OF INVENTION: Cloning and Recombinant Production of
ITILE OF INVENTION: Cloning and Receptor(8)
FILE REFERENCE: P41 9886
CURRENT PILING DATE: 1995-01-17
EARLIER APPLICATION NUMBER: US 08/374,009A
CURRENT FILING DATE: 1995-01-17
EARLIER FILING DATE: 1994-01-09
EARLIER FILING DATE: 1993-06-18
EARLIER FILING DATE: 1993-06-18
EARLIER FILING DATE: 1993-06-18
